Overview

In Year 10 you will study: Component 01 – Computer Systems. This is an examined unit and makes up 50% of the assessment total. It focuses on the hardware, software and networks that form a modern computer system

Term 1

In the first part of the term, you will learn about the system's architecture of a computer system. In the second part of the term, you will learn about the memory and storage of a computer system.

Year 10
Computer Science

Term 2

In the first part of the term, you will learn about computer networks, connections and protocols. In the second part of the term, you will learn about network security.

Term 3

In the first part of the term, you will learn about systems software. In the second part of the term, you will learn about the ethical, legal, cultural and environmental impacts of digital technology
